

Smoke Alarm Testing

For your own safety and the safety of your flat mates please test the smoke alarm nearest to your bedroom door monthly.

To test the alarm press and hold the TEST button until the unit beeps.

If your unit is activated accidentally (like by cooking) then press the HUSH button to stop the beeping (in hush mode the unit will give little 'peeps' for 8 minutes)

Please text 021 2566 779 if you need new batteries for your smoke alarm.
